

# THE MODERN DATA STACK

March 2025

## Master the Art of Proactive Cloud Cost Forecasting

Tired of budget surprises? It's time to shift from reactive spending to proactive optimization. Learn how to gain granular visibility into your cloud expenses, take control of usage, and fine-tune your code and infrastructure for optimal cost-performance balance. Discover five game-changing strategies that will help you bid farewell to unexpected overruns and inefficient resource allocation.

**UNLOCK THE SECRETS**

## Elevate Your FinOps Game with Key Performance Metrics

Are you tracking the metrics that truly matter? Watch the 5-part on-demand video series that explores cutting-edge strategies for maximizing ROI in your data environments. Learn how to measure cost per query, cost per pipeline, and data-to-insight time to drive informed decision-making and operational excellence.

## Tame Your Databricks Costs in 30-Minutes a Week

Embark on a cost optimization journey with our power-packed 30-minute sessions. From AI-driven cost management to building lean ETL pipelines, we've got you covered. Join us every week to master the art of scaling operations within budget while keeping your data teams aligned with financial objectives.

[REGISTER NOW](#)

## Cultivate a Cost-Conscious Data Engineering Culture

Ready to make cost awareness second nature to your data engineering team? Discover how to weave FinOps principles into your organizational DNA. Learn to democratize cost visibility, integrate cost intelligence into your development lifecycle, and foster a culture of continuous financial optimization.
