Untold, the Unravel Newsletter: November 2020

Greetings from Unravel,

We are re-introducing this newsletter with a reminder: our first-ever customer conference, also called Untold, is being held this week! You will get to hear from your peers and improve your knowledge of how to get the most out of working with Unravel.

So please join us this Thursday, November 19th at 6:15am PST for the welcome and keynote, from Unravel Co-Founder and CEO Kunal Agarwal. Four talks follow, immediately after. Attendees get a VIP swag box!

You can view the event, speaker lineup and signup here:
https://unraveldata.com/untoldconf-2020/
Don't worry if you can't attend live on the day. Just register, and we will send you the session recordings.

Please forward this newsletter to colleagues who might be interested in Unravel Data and this week's customer conference.

1. Untold - Our Customer Community Event for #datalovers
This first-of-its-kind event is this Thursday, from 6:15am-10:30am PST. (Add three hours for the US East Coast; eight hours for London; and twelve and a half hours for New Delhi.) Our speaking slots quickly filled with inspiring presentations from DBS Bank, Adobe, 84.51°/Kroger, Humana, and Mastercard, speaking on the latest DataOps innovations in the enterprise. Find more information and register here:
https://unraveldata.com/untoldconf-2020/

2. Unravel Release 4.6.2.0 Released to Customers
Unravel software is now more powerful and easier to access. We have added a new user interface and improved the user experience. We now have multi-cluster support - an urgent requirement of one key Unravel customer, and a future requirement for many more. We also have monitoring for ELK and a new installer. Please read the Unravel Data 4.6.2.0 blog post to learn more.

3. CDO Battlescars Makes a Mark
Kunal recently rounded up key takeaways from our CDO sessions with big data leaders at Equifax, Anheuser-Busch, DBS Bank, and Unravel. They discussed DataOps, move to cloud, and more. And Unravel CDO

Sandeep Uttamchandani has launched CDO Battlescars, a new podcast on all things data, with six intriguing sessions already available. Join here.

4. Enhanced Visibility for Databricks

Databricks makes key Spark capabilities available in the cloud, adding flexibility and scalability - and DataOps is crucial to success with Databricks. Mick Nolen of Unravel explains how Unravel Data enhances visibility for Databricks, making it easy to optimize resource use and predict and manage costs. View the Databricks webinar.

5. Ten Steps to Cloud Migration

What's the big picture on how to move workloads from your on-premises estate to the cloud? Which workloads to move first? What cloud platform, and which cloud services, to move them to? We present a ten-step process for successfully mastering cloud migration, with positive ROI and less stress. Read the blog post and view the Big Data London webinar.

6. Query or Not to Query in Spark?

Whether, and when, to run a potentially time-consuming Spark query can be a very expensive question. Unravel engineers Prajakta Kalmegh and Yusaku Sato are delivering a conference talk for Data + AI Summit on exactly this topic. They describe a Dash-app called qSteer that estimates query impact and alerts users of possible delays, with options as to future time slots when their query might run safely. View the talk.
