

## Untold, the Unravel Newsletter: September 2021

DataOps Unleashed, Second Edition, is now less than six months away. The [DataOps Unleashed session recordings](#) from last March include [MasterCard's session on pre-empting harmful workloads](#), which is well worth your time. Please contact us now if you would like to [speak at](#) or [sponsor](#) the second edition.

Also, [Towards Data Science](#) is a sharp, technically oriented Medium publication for data science practitioners and their friends (recommended). In a valuable article, [Why DataOps Is Here to Stay](#), Sean Knapp, CEO of Ascend.io, focuses on data pipelines as the key focus for successful DataOps practice.

Cheers,

Kunal

### === Unravel Speaks ===

When we're not working on DataOps Unleashed for the New Year, we're busy with related conferences and other outreach. We invite you to tune in here.

#### 1. Unravel Data at DataOps Summit 2021

On this Thursday, September 30th, Unravel Data CTO Shivnath Babu speaks on [DataOps for the New Data Stack](#), as AI and machine learning join the operational party. Use the link to sign up in advance or view the talk on demand.

#### 2. Bringing Practical AI to Life

Unravel is a leader in using AI to take on challenges. Now, Sandeep Uttamchandani delivers a series of Practical AI Tips on YouTube. In [Practical AI Tips #5](#), for example, Sandeep describes how to build a unicorn AI team - without chasing unicorns!

#### 3. Airflow for Enterprise Scheduling

The virtually peripatetic Shivnath Babu spoke at Airflow Summit 2021 on [Migrating Data Pipelines from Enterprise Schedulers to Airflow](#). If you're used to tools like Oozie, what can Airflow do for you? Click the link to watch live as Shivnath reveals all.

### === Diving Deeper into Spark Troubleshooting ===

We at Unravel are all in on Spark troubleshooting. Here are just a few

of the resources we're creating and sharing to help you take on this key DataOps challenge.

#### 4. What Tools Do You Have for Spark Troubleshooting

We have a new blog post in our three-part Spark troubleshooting series: [Spark Troubleshooting Part 2: Five Kinds of Solutions](#). We discuss your favorite tools, such as Spark UI, and show how they all fit together - as well as some gaps we've seen.

#### 5. Troubleshooting Spark, Amazon EMR, and Databricks

Our troubleshooting webinars are coming in fast! You can view [Spark Troubleshooting](#) and [Databricks Troubleshooting](#) now, and sign up for [Amazon EMR Troubleshooting](#) soon. And be sure to sign up for our [Spark cost management webinar](#) in October.

#### === Keeping Up on DataOps ===

We like to take in fresh perspectives, especially those grounded in new research.

#### 6. New Challenges Arise as Tech Usage Explodes

This article, [From Big Data to Big Ops](#), describes how applications such as Order to Cash, Data Pipelines, and IT Operations lead as commonly automated processes, with more to come.

#### === Get Our Spark Troubleshooting Download ===

We've rendered our Five Kinds of Solutions blog post for Spark troubleshooting, described above, as a downloadable, emailable, tweetable, and otherwise highly readable and shareable PDF! [Download it now](#) and dig deep.
